ADR

Classification of dangerous goods and substances (assignment of goods to a class, subclass, category and group) is carried out depending on the type and degree of danger of goods and substances ADR / ADR. The following classification of dangerous goods and substances has been established:

1 class

explosive materials (VM)

2 class

compressed, liquefied and dissolved gases under pressure

3 class

flammable liquids (LVH)

4 class

flammable solid loads and substances (LV); spontaneous combustible goods and substances (CB); goods and substances that emit flammable gases in contact with water.

5 class

oxidizing substances (OK) and organic peroxides (OP)

6 class

toxic substances (IV) and infectious goods and substances (IW)

7 class

radioactive materials (RM)

8 class

caustic and (or) corrosive goods and substances (EC)

9 class

other dangerous goods and substances
